

Jump start to your hybrid IT architecture

PRIMEFLEX Integrated Systems

Building a new IT architecture in a heavily distributed IT landscape is increasingly complex, error prone, time consuming, and expensive.

With PRIMEFLEX, Fsas Technologies provides a whole range of pre-defined, pre-integrated, and pre-tested hybrid IT-enabled systems that have been specifically designed to streamline the deployment, operation and maintenance of the on-premises infrastructure foundation for your hybrid data architecture.

Thanks to the unique combination of a pre-integrated and certified technology stack, new standardized implementation and infrastructure support services providing technical solution support with a single point of contact, PRIMEFLEX systems offer a significant better life cycle experience in operating data-driven architectures.

Your advantages:

- Get fast time to production
- Increase life cycle experience
- Reduce downtime

Transform with confidence to your new hybrid IT architecture

As a trusted advisor with globally available experience in developing and implementing technology and services, we help you to make the right choice of architectural design to achieve your specific outcomes based on your strategic needs.

With the first shipment back in 2002, Fsas Technologies has the longest track record in delivering integrated systems. Today, the PRIMEFLEX portfolio supports a wide range of workloads and covers key usage scenarios like virtualization, cloud, and SAP deployments.

Simplify path to hybrid cloud

Adopt the best mix of cloud and on-premises technologies by integrating with major public cloud service providers.

Enjoy outstanding flexibility and choice

Select from a broad range of hardware and software options to fine-tune your data architecture to your specific needs.

Get a fast time to production

Mitigate risk with pre-designed, pre-tested and certified systems deployed by implementation experts.

Reduce life cycle costs

Enable huge cost savings in every phase of the system life cycle – from deployment to operations and maintenance.

Deploy cutting-edge technology

Build your new data architecture with best-in-class components from Fujitsu or leading third parties – optimally harmonized to best support your particular use case.

Streamline operations

Reduce management silos with converged life cycle management across servers, storage, networking, and third-party devices.

Grow as you go

Start small and scale up with the architecture that best meets the specific scalability requirements (vertical or horizontal) of your workloads.

Protect your business

Safeguard your business against a wide variety of failures – from a single component to an entire site.

Leverage flexible service options

Take advantage of flexible service options covering all life cycle phases – across consulting, financing, design, on-site deployment, integration, migration, life cycle management, and maintenance.

Enjoy one-stop support

Get 24/7 infrastructure support with a single point of contact for the complete hardware and software stack, dramatically improving the time to incident resolution.
